

## Start the barbecue season safely and stylishly

F. DICK is starting the new barbecue season safely and in style this year. A leather apron and matching leather roll bag perfectly complement F. Dick's high-quality barbecue tool range and can be used stylishly and safely by all barbecue enthusiasts.

The two products are made of supple 100% buffalo leather, naturally tanned, with a vintage look, while the colour-contrasting logo appliqué's add a touch of refinement. Handmade in the Netherlands.

The apron adapts perfectly to the body thanks to the flexibility of the high-quality leather. The adjustable solid leather straps with a buckle fastener at the neck and hip make it comfortable to wear. At 82 cm (32") in length, it provides reliable protection, especially at a hot barbecue. With a practical hanging loop, a tea towel and other tools, such as barbecue tongs, are always close at hand.

The apron measures 82 x 60 cm (32" x 23.5").

# Press Release

The leather roll bag, which matches the leather apron, has 5 pockets that can be individually equipped. Here too, the supple leather impresses with its vintage look. Knives and tools can be transported safely and stylishly thanks to the adjustable solid leather strap with a buckle fastener.

The roll bag measures 45 x 47 cm (17.5" x 18.5").

Friedr. Dick has focused on sharpness since 1778: a success story that began with a small file cutter workshop in the southern German town of Esslingen, which developed into a high-quality business with a complete product range for chefs and butchers and evolved from a file specialist to a paragon for really good knives. Strict quality criteria and high design standards characterise the traditional brand for professionals, which is now finding its way into domestic kitchens. Every Friedr. Dick knife is made of the highest quality steel and impresses with perfectly balanced blades as well as ergonomically shaped handles for perfect cutting results. The long-standing tradition and experience of manufacturing products for professionals allow us to continuously develop innovative new products.
