<tr>
<td>7 5981 35</td>
<td>35 cm = 14”</td>
</tr>
</tbody>
</table>

The special sapphire cut of the classic DICKORON facilitates a velvet soft sharpening. Thanks to reduced knife consumption, the edge retention of a perfectly ground knife is extended without roughening the edge. This sharpening steel is perfectly combined with the **DICK polish**.

**DICK micro**

<table>
<thead>
<tr>

</thead>
<tbody>
<tr>
<td>7 5003 30</td>
<td>30 cm = 12”</td>
</tr>
</tbody>
</table>

The superfine cut steel for specialists! The extreme fine cut of the **DICK micro** smoothens the finely ground edge rather than abrasing any material, thus ensuring a higher retention of the very fine edge. This sharpening steel is perfectly combined with the **DICK polish**, meeting the requirements of every demanding butcher.

**DICK polish**

<td>7 5503 30</td>
<td>30 cm = 12”</td>
</tr>
</tbody>
</table>

A smooth cut requires a slender cutting angle. This is the reason why the edge tends to bend easily long before being blunt from wear. This mirror finished and hard-chrome plated sharpening steel is perfectly suited to straighten the edge.

High efficiency and reduced fatigue. Especially suited for butchers working on the cutting line.

**DICK combi**

<table>
<thead>
<tr>
<th>Prod.-No.</th>
<th>Length</th>
</tr>
</thead>
<tbody>
<tr>
<td>7 5982 30</td>
<td>30 cm = 12”</td>
</tr>
</tbody>
</table>

Sharpening and polishing with **one** steel: First sharpening of the edge on the two sapphire cut sides and afterwards straightening the edge on the two polished sides.

The ideal steel for everyone who prefers to work with a **single** steel only.

**DICK hygienic**
