SM-200 TE

THE SHARPENING MACHINE FOR PROFESSIONAL GRINDING OF CUTTER AND CIRCULAR KNIVES

- Stainless steel construction
- Electrically operated angle setting
- External water cooling device
- For all current machine knives and other cutting tools

Illustration: with universal angle setting device

Your dealer:
Water cooled Grinding Machine SM-200 TE
Your specialist for grinding technology

Features:
- Cup wheel: for quick initial material removal
- Water cooled grinding belt: to refine and polish the surface and grinding of hand knives, cleavers and other cutting tools
- Lamellar buffing wheel: to deburr and polish the blade
- Universal angle setting device: for linear and sickle shaped machine knives
- Cooling device: circular flow of water for all grinding stations to assure that blades are not overheated during grinding process
- Electrically operated foot control for angle setting device: continuously adjustable grinding angle for accurate and exact sharpening

Optional Accessories:
- Emery Belt Grinding Attachment to grind cutter and machine knives
- Circular blade grinding device for circular blades up to 550 mm diameter
- Wide range of grinding belts, cup wheel etc.
- Universal base frame on casters

UB3F-XL
- Machine knives grinding radius 2 1/2” up to 15”
  D = 13”, W = 19 3/4”, H = 16 3/4”
